In response to the outstanding Restriction Requirement in this application, Applicants elect for further prosecution of the claim of Group I, namely Claim 1, drawn to a method for screening a bioactive agent capable of binding to a cell cycle protein R0101. This election is made with traverse. In particular, Applicants submit that it is unreasonable to divide an application which only has 9 claims into 5 different prosecutions. Moreover, Applicants submit that it would not be an undue burden to the Examiner to consider at least one of group along with the elected Group 1, particularly considering that Group 1 only contains one claim. If the Examiner does not wish to consider at least one other group at this time, Applicants request that the Examiner revisit this issue during prosecution.

The Examiner is invited to contact the undersigned at (415) 781-1989 if any issues may be resolved in that manner.

Respectfully submitted,
